GRAZAC GRADUATE ACCELERATOR CHALLENGE 2 QUESTION

Name; Ajayi Adeleke

Course; Front- end Web Development

Product Description
You have been hired as a front-end developer to join our developers' team. Your major work is to implement the **Landing Page, the Sign in and Sign up page** on the figma page. The design team is very strict with their designs and they wouldn't like you to do something different from what has been designed.

https://www.figma.com/file/YEFBxzuMjxA5k8tXSaOGTb/Untitled?node-id=0%3A3

Feel free to explore and use your knowledge of HTML, CSS and also JavaScript where applicable.

NOTE: If you don't have the mobile view design on your figma page, please make use of your initiative. Most importantly make sure you link all pages and your design is mobile responsive and the hamburger menu must work perfectly so users can easily gain access to other pages you have implemented when the user is on the homepage on a mobile phone. If you also don't have the menu design, use your initiative to come up with one or search online for samples and implement it using JavaScript.

Mode of submission

1. Fill this form before your presentation: **Challenge 2 Submission** you are required to submit your vercel link and GitHub repository.

2. Prepare for your presentation on Wednesday, 22nd of March, 2023

I wish you best of luck.
